

PITON

THE SURFACE

THE NEW DIMENSION OF VELVETY MATT

TOUCHING IS WELCOME

Does anyone want fingerprints on panel surfaces?

Okay, maybe the Criminal Investigation Department. But everyone else loves the “anti-fingerprint” touch!

PITON
THE S U R F A C E

PITON – The surface

Inspired by nature: elegant, aesthetic and robust, yet still velvety soft. The surface of the PITON composite panel has a fascinating feel. Referencing the python snake, the name “PITON” guarantees this unique touch every time you run your fingers over its surface. And: like snakeskin, the PITON surface is extremely robust and adaptable as well.

JUST “MATT” IS NOT ENOUGH.

PITON is the solution – The first prefab composite panel of this kind

The new dimension of velvety matt surfaces

PITON composite panels consist of a MDF carrier. The homogeneous, imbued structure with its extremely rugged surface lays the foundation for a unique panel material. Unrivalled in its look, feel and versatile uses. Fingerprints have no chance.

What is the secret of PITON?

PITON is a lacquered composite panel. The surface is finished by electron beam hardening. Not only does this completely seal the surface, it also makes the panel extremely robust, water-repellent and UV-resistant.

Economy

PITON lets you save time and costs. The finished composite panel does not require any elaborate coating with other materials. PITON is extremely easy to process using standard tools.

► **No chipping of the edges**

► **No whitening**

A strongly adhesive film, developed specifically for edgeband glueing machines, protects the surface additionally. The film is easy to remove after installation, leaving absolutely no residue. What if the surface does become scratched? No problem – micro-scratches are easy to remove.

The green touch

The PITON surface uses no phenol or melamine, is antibacterial, food-safe, PVC-free and easy to clean.

Extremely versatile

PITON can be used anywhere in interior design and can be mounted vertically and horizontally.

- **Shop systems**
- **Home and business furniture**
- **Kitchens**
- **Bathrooms**
- **Partition walls**
- **and much more**

PITON – The new look for interior design

Create your space any way you like. The PITON panel material gives creative designers the complete freedom they crave. Wrapped up in a quality that guarantees a fascinating look and feel, even after years.

Individual formats

We can also offer you custom-built panels. Simply contact us by telephone or e-mail to inquire.

PITON at a glance

Carrier	Thickness	Format
 MDF	19 mm	2,800 × 1,220 mm
 HPL (brown core)	0.9 mm	3,050 / 4,200 × 1,300 mm
 HPL (white core)	0.9 mm	3,050 / 4,200 × 1,300 mm
 HPL (black core)	0.9 mm	3,050 / 4,200 × 1,300 mm

Coating

MDF PITON paint system surface as shown in the colour range. Backing – Décor coating, slightly structured in the same colour

HPL PITON paint system surface as shown in the colour range. Backing – Same material and colour as the core

Carrier panels

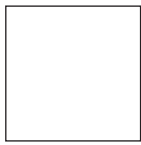

Other carrier panels, e.g. Swiss-CDF, Finsa-Compact, Valchromat, HPL-Compact on request.
